

VoIP is Telephony for the Digital Age

Feature-Rich Capabilities. Powerful Corporate Connectivity.

Did you know that VoIP can help improve business efficiency, boost employee productivity, and save you money?

VoIP is next-generation telephony that leverages the same infrastructure and technology that underlies your computer network. When deployed by an expert, VoIP is far more than just a replacement for your telephone; it has the power to revolutionize how you operate and grow your business.

Manhattan Tech Support, an award-winning IT partner, is NYC's highest-rated provider of VoIP solutions

A decorated leader of NYC's technology services industry for over 20 years

Customized solutions that help you maximize the business impact of your VoIP solution

A diverse team of certified technology experts working for you

The Reasons Why VoIP is Superior to Landlines

- **Eliminates long-distance charges** and radically **lowers international calling fees**, making it ideal for companies with remote workers or operations in several locations
- Gives staff working onsite or remotely **a single phone number for all their devices**, **improving team efficiency**, and **helping your customers quickly and reliably connect** with your team
- **Scales up or down** to meet your changing needs without burdensome capital expenditures or additional maintenance fees
- **Integrates deeply** into **digital workflows**, making collaboration easier, and improving employee productivity

Manhattan Tech Support Makes VoIP Easy

Without the proper expertise, VoIP systems often fail to deliver on their full potential. To make sure your VoIP system provides **the maximum return on investment (ROI)**, you should partner with an **award-winning VoIP expert**.

- All our VoIP engagements start with a **deep analysis of your existing systems and business needs**, ensuring that your new VoIP system supports your goals
- We have documented processes for ensuring **VoIP quality of service (QoS)**, providing optimal call quality while minimizing technical hiccups and roadblocks
- **Flat-fee maintenance** of your VoIP system ensures that your VoIP functions as you want while letting you **budget with complete confidence**
- We're **not just VoIP experts**; we're a **veteran technology services partner** who provides **comprehensive management** of your telecommunications, computer network, mobile technology, cybersecurity, and much more

All this for one flat monthly fee

VoIP is quickly becoming the standard for business telephony

Small businesses that deploy VoIP can save 40% on long distance and up to 90% on international calls

VoIP saves an average of 32 minutes per employee per day by allowing staff to reach one another on the first try

The number of total VoIP users surpassed 1 billion in 2017 and is set to reach 3 billion by 2021
